

Improves Quality of Life

FITSULIN-DMTM

- Reduces side effect of diabetes.
- Controls Glucose level.

Pancreas gland makes Insulin

Type II diabetes Mellitus is hyperglycemic metabolic disease (Elevated Glucose level in blood). It is because of resistance which is created by cells or lack of insulin, if it is not being properly controlled than diabetes damages kidney, coronary arteries, heart, brain and certain secondary infections too. FITSULIN-DM is the combination of herbal extracts that effectively cures these kinds of diseases and provides symptomatic relief.
